# Packaging Products in Poly Bags

---

Sellers may choose to package their products in a poly bag to protect the product. If they choose to do so they need to follow the below guidelines:

- Poly bags with a 5-inch opening or larger (measured when flat) must have a suffocation warning, either printed on the bag or attached as a label. Failure to apply a suffocation warning may lead to the items being re-bagged.
- The warning must be printed or placed in a prominent location and in a legible font size for the size of the bag.
- Below we have provided examples of the requested print size.

Total length + Width of bag	Minimum font size
60 or more inches	24 Point
40-59 Inches	18 Point
30-39 Inches	14 Point
Less than 29 inches	10 Point

- The thickness of the bag must be 1.5mil
- The poly bag must have a scannable barcode label on the outside of the bag
- The bag must be transparent
- The bag must be completely sealed
- The bag or shrink wrap must not protrude more than 3 inches past the dimensions of the product
- Adult products must be packaged using black, opaque poly bagging or shrink wrap
- Scented products must be sealed or bagged to prevent the absorption of scent onto other products in the Fulfillment Center

## Products That Require Poly Bags

---

- Apparel on hangers
- Apparel, fabric, plush & textiles
- Baby products
- Liquids (non-glass)
- Perforated packaging
- Powder, pellets, and granular
